EXPERIENCE

Web Developer

Educor

- 01/2023 - Present Durban, South Africa/ Remote
- Built and maintained high-performing, conversion-focused websites, landing pages aligned with marketing and growth strategies.
 - Translated UX requirements, and messaging into scalable, reusable web components and templates optimized for lead generation and revenue growth.
 - Developed and customized websites using WordPress, leveraging CMS-driven architectures for dynamic, content-rich experiences.
 - Implemented structured customer journeys across pages, forms, and content systems to support predictable acquisition and conversion flows.
 - Optimized websites for performance, page speed, accessibility, and SEO fundamentals, improving load times and user engagement.
 - Wrote clean, maintainable HTML, CSS, and JavaScript, reducing technical debt and improving long-term scalability.
 - Collaborated closely with marketing and growth teams to rapidly launch, iterate, and optimize funnel pages for active campaigns.
 - Supported A/B testing, experimentation, and rapid iteration, enabling data-driven conversion improvements.
 - Integrated websites with CRM, email marketing, analytics, and automation platforms, ensuring accurate data capture and reliable downstream workflows.
 - Implemented and validated tracking, analytics events, and conversion goals, ensuring clean and reliable reporting.
 - Conducted thorough QA, cross-browser testing, and performance checks to maintain consistency and reliability across environments.

Front End Developer

Conversation LAB

- 12/2020 - 12/2022 Durban, South Africa
- Conducted thorough QA, cross-browser testing, and performance checks to maintain consistency and reliability across environments.
 - Refactored and enhanced reusable components monthly, improving development efficiency and delivery speed.
 - Maintained clear documentation for CMS structures, integrations, and reusable components to support team scalability and handoff.
 - Supported high-traffic campaigns by ensuring websites were stable, scalable, and resilient under increased demand.
 - Collaborated with various cross-functional teams like design, product management, and backend architects and development teams to validate prototypes and create elegant, usable, responsive, and interactive interfaces that meet client requirements.
 - Suggested continuous improvements in user interface, software architecture, or new technologies.
 - Designed and developed the website front-end. Oversaw the development of the website back-end, integrating databases and servers for seamless operation.
 - Created the website architecture to ensure robust performance and scalability.
 - Translated wireframes into functional requirements, wrote well-abstracted, reusable, high-performance code for UI components using CSS, HTML, and JavaScript.
 - Converted user stories into functional logic and systems.
 - Architected, developed, and tested for cross-browser and cross-platform applications.

SUMMARY
